SUMMARY

Frontend developer skilled in building responsive, high-performance, and pixel-perfect web interfaces using JavaScript, React.js, Next.js, and Tailwind CSS.

SKILLS & TOOLS

HTML | CSS | JavaScript | React.js | Next.js | Tailwind CSS | Git & GitHub | BaaS (Supabase, Firebase) | CMS (Sanity)

WORK EXPERIENCE

Pyraglle — Frontend Engineer (Remote)

Aug 2023 – Dec 2024

- Built and maintained reusable UI components using React.js, improving development efficiency and consistency across the app.
 - Optimized performance and load time using lazy loading and image optimization, increasing Lighthouse performance scores by 50+ points.
 - Collaborated with designers to implement pixel-perfect, responsive layouts using Tailwind CSS and Figma, significantly reducing UI bugs.
-

PROJECTS

GlitzInteriors – E-commerce Store

Built with Next.js, Sanity CMS, Stripe, Framer Motion, Tailwind CSS

- Built a fast, SEO-friendly e-commerce site using Next.js features like dynamic routing and server-side rendering.
- Integrated Sanity CMS for real-time product management and stripe for payments.
- Configured CI/CD with Vercel for automatic deployment and version control via GitHub.
